

REMARKS

By this Amendment, Applicants amend claims 1, 6, 10 and 14 to further clarify the invention and add new claims 21-24. No new matter is added. Support for the amendments and new claims can be found throughout the specification, *e.g.*, at pages 6, 7, and 13 of the specification as filed. Accordingly, claims 1-24 are all the claims currently pending in the application.

Applicants thank the Examiner for the courteous telephonic interview on September 18, 2008. The PTO-413 requires the Applicant to file a Statement of Substance of the Interview. The Statement of Substance of the Interviews is as follows:

During the interview, the prior art of records was discussed with respect to claim 1. As a result, the Examiner proposed amending claim 1 to recite either “pre-planning the real-time communication before the communication starts” or “each partial cycle for transmitting real-time communication comprises of microcycles.” The Examiner indicated that each of the above-quoted features would overcome the prior art of record. However, further search would be required.

In view of the foregoing and to expedite the prosecution of the above-identified application, Applicants have amended independent claims 1, 6, 10 and 14 and added new claims 21-24. Applicants respectfully submit that independent claims 1, 6, 10 and 14 are clearly patentable over the prior art of record. New claims 21-24 are patentable at least by virtue of their dependencies from claims 1, 6, 10, and 14, respectively.

Entry and consideration of this Amendment are respectfully requested.
